AADONA - Dead on Arrival (DOA) Warranty Policy

1. Introduction

This Dead on Arrival (DOA) Warranty Policy defines the terms under which AADONA provides immediate replacement support for products that fail to function out-of-the-box. This policy applies to all eligible AADONA products purchased through authorized channels within India.

2. Definition of DOA

A product will be considered Dead on Arrival (DOA) if it fails to power ON, shows critical malfunction within the first use, is unable to perform its primary intended function, or is received physically damaged only if box is intact and damage is proven to be a manufacturing defect.

3. DOA Eligibility Window

DOA claim must be raised within 7 calendar days from the date of purchase. The customer must register the DOA complaint through AADONA website under the customer login section.

4. Mandatory Requirements for DOA Claim

Customers must submit the DOA claim form along with:

- Model name

- Serial number (correct entry mandatory)

- Date of purchase

- Invoice copy

- Full name of purchase source

- City of purchase

- Product registration token number

- Product photos/videos clearly showing the issue

- Unboxing video recommended

5. DOA Verification Process

AADONA Technical Support Team will evaluate the provided evidence. If the claim is preliminarily approved, the customer will be notified with shipping instructions. The product must only be shipped to the officially communicated address. If sent to any other address, the DOA claim will be rejected.

6. Replacement Process

If the unit is approved as DOA, AADONA will provide 100% replacement subject to stock availability. If the same model is unavailable, an equivalent or upgraded model will be offered. Estimated replacement dispatch time: within 3–5 working days after physical verification.

7. Shipping Conditions

Customer must ship the product to the authorized service address shared via email. Product must be shipped in original box with all accessories. Improper packaging that causes transit damage may lead to claim rejection. AADONA will bear return shipping charges for replacement shipment.

8. Cases Not Covered Under DOA

DOA does not cover issues due to wrong installation, customer-caused physical damage, missing accessories, tampering, box damage post-purchase, missing or tampered serial number, or electrical surge damage.

9. DOA Claim Rejection Criteria

Rejection may occur if claim is raised after 7 days, serial number mismatch, product sent to wrong address, customer-caused damage, missing evidence, or missing packaging/accessories.

10. DOA Processing Flow

Customer receives product → Issue within 7 days → Login & Submit DOA Form → AADONA Assessment → (Reject / Pre-Approve) → Ship to authorized address → Physical Verification → (Reject / Approve) → Replacement Dispatch.

11. Final Conditions

DOA replacement does not restart or extend warranty. AADONA's decision after technical evaluation is final and binding.

12. Legal Jurisdiction

All disputes arising out of or connected with this policy shall be subject to exclusive jurisdiction of courts in Raipur, Chhattisgarh, India.
